OBJECTIVE

A curious learner and creative team player, interesting in the job role of Software engineer. Where I can utilize my understanding of coding and software development to efficiently fulfil the requirements of clients and customers.

EXPERIENCE

Software Engineer (Backend Developer)

🏢 Mobcoder 📅 Feb 2022 – Present

- Developed and maintained scalable and efficient backend systems using Node.js, Express.js, and JavaScript.
- Designed and implemented RESTful APIs for seamless communication between the frontend and backend components of web applications.
- Integrated third-party services, such as payment gateways and social media APIs, into the backend architecture to enhance application functionality.
- Utilized MongoDB and SQL databases to store and manage data, ensuring data integrity and optimal query performance.
- Implemented user authentication and authorization using JWT (JSON Web Tokens) and OAuth protocols.
- Collaborated with the frontend development team to ensure smooth integration of APIs and optimize overall application performance.
- Utilized version control systems, such as Git, to manage source code and collaborate with other developers effectively.

PROJECT

• SYN (Sell Your NFT)

📅 Mar 2022 – Sep 2022

- Developed backend for SYN project, an NFT marketplace allowing users to sell and buy NFTs. Implemented a user-friendly interface for sellers to list NFTs and buyers to purchase them using crypto-wallets.
- Integrated secure payment integration and authentication mechanisms. Collaborated with a cross-functional team to ensure seamless frontend-backend integration and delivered a high-quality NFT marketplace solution.

• Dobrh (A Freelancing Platform Development)

📅 Sep 2022 – Present

- Developed a backend for freelancing platform from scratch, enabling users to hire talent and purchase services for posted projects. Implemented authentication, wallet management (DOBS), and review systems.
- Built the backend using Node.js and MongoDB, integrating Redis for caching and optimizing application performance. Integrated SendGrid for email notifications. Developed an admin panel for efficient project management.
